Pennsylvanta Election

We are gratified to state, that the infamous attempt to gerrymander upon the part of our locofoco friends, in regard to our Congressional Districts, has met with the re buke it deserved. The late election has shown that we have a conservative force in Pennsylvania which tells with energy when roperty called forth and exercised. The Whigs have shown what they can do, and

what they WILE DO. Our Districts were arranged so cunningly, as our opponents supposed, with Gev. Porter's vetos, &c as to allow us but five or six members out of twenty lour; and yet what has been the result? We have the majority of members in the next Congresshaving thirteen Whigs to eleven Loco focos!

As regards members of the Legislature, we are still a little behind them; but the gain, since last year, upon them even there, under their gerrymandering, is an evidence of what they may expect next year. We have but little doubt, that at the election in 1844, we shall sweep their little majority in manner that will astound them. The people are for HARKY CLAY! and mer that will sustain him!
